PROJECTS

E-commerce Website Development

JAN 2025 - FEB 2025

- Developed a comprehensive e-commerce API using Java (Spring Boot) for secure management of users, vendors, staff, and products with role-based access control and authentication.
- Implemented user authentication and authorization, enabling secure login, sign-up, and admin-exclusive staff creation.
- Enhanced the user experience by implementing optimized product search, product browsing, vendor details display, and server-side pagination for efficient listing.

Employment Management System

DEC 2024 - JAN 2025

Developed a robust employee management application using Java and Spring Boot for the back end, with HTML and CSS for a responsive UI. Features include login, employee management, search, and structured MVC architecture for an intuitive experience.

Dynamic Responsive Webpage

NOV 2024 - DEC 2024

Designed a professional business website using HTML and CSS with key sections like home, services, team, and blog. Implemented a responsive design for seamless navigation, accessibility, and scalability across all devices.
